Oracle Database (commonly referred to as Oracle RDBMS or simply as Oracle) is a multi-model database management system produced and marketed by Oracle Corporation.. It is a database commonly used for running online transaction processing (OLTP), data warehousing (DW) and mixed (OLTP & DW) database workloads.

Oracle Database - Wikipedia

The Premiere Industry Certification: Oracle. Oracle is the world's largest enterprise software company and Oracle certification carries significant weight throughout the software industry.

Oracle Certification - Austin Community College District

PL/SQL program unit. The main feature of SQL (non procedural) is also a drawback of SQL: one cannot use control statements (decision-making or iterative control) if only SQL is to be used. PL/SQL is basically a procedural language, which provides functionality of decision making, iteration and many more features like other procedural programming languages.

PL/SQL - Wikipedia

SQL 2 1986 " IBM developed the first prototype of relational database and standardized by ANSI. The first relational database was released by Relational Software which later came to be known as Oracle. SQL Process When you are executing an SQL command for any RDBMS, the system determines the

Oracle Articles for experts only

There has been a lot of debates around when to use stored procedures vs. raw sql. Many purists are vehemently on one side of the fence or the other. Strangely people talk about views to a lesser extent. Stored functions and triggers are almost nonexistent in these debates. In this article we'll try to provide a non-biased outline of the benefits and pitfalls of each approach.

Choice Between Stored Procedures, Functions, Views

The first three articles in this series focused on the fundamentals of working with Python in SQL Server Machine Learning Services (MLS). The articles demonstrated how to run Python scripts within the context of a SQL Server database, using data from that database. If you reviewed these article, you ...
