about accounting doctrines with subpopulations of accountants (professors, practitioners, and students). Finally, there is the 'bilingual' thesis, which seems to be that bilingual people are intellectually better off. R-B appends an empirical study to show that language (English versus French) has some effect on how accounting concepts are understood.

Abstract. We investigate the impact of audit quality on the quality of government in a large cross-section of countries. We assess government performance using measures of six dimensions of governance, namely, voice and accountability, political stability, government effectiveness, regulatory quality, rule of law and control of corruption.
