In mathematical modeling, statistical modeling and experimental sciences, the values of dependent variables depend on the values of independent variables. The dependent variables represent the output or outcome whose variation is being studied. The independent variables, also known in a statistical context as regressors, represent inputs or causes, that is, potential reasons for variation.

**Dependent and independent variables - Wikipedia**

Dependent variables are variables whose values are determined by the values of other variables. Independent variables are variables whose values are not determined by the values of other variables. In a statistical context, independent variables are also known as regressors.

**Lei dos Gases Ideais - Wikipedia**

A lei dos gases ideais é a chamada equação de estado dos gases ideais, também chamado de gás perfeito. Empiricamente, em tal lei, observam-se uma série de relações entre a temperatura, a pressão e o volume do gás que ocupa o lugar. A lei dos gases ideais, enunciada pela primeira vez por Benoît Paul Émile Clapeyron, em 1834, [1] o que conferencia, em muitos casos, o título equação de Clapeyron para ...
