Students who wish to enroll in Calculus should be able to easily solve most or all of the problems on the diagnostic test above without using a calculator. Students who do not have a solid algebra background will not be successful in a good calculus course. It is vital that students have mastered the basic high-school math curriculum—algebra, geometry, trigonometry—before attempting a calculus course.

Here are some pointers for doing story problems: 1. Carefully read each problem twice before writing anything. 2. Assign letters to quantities that are described only in words; draw a diagram if appropriate. 3. Decide which letters are constants and which are variables. A letter stands for a constant if its value remains the same throughout the problem. 4.
