Reidenbach et al. discover small-molecule and lipid ligands for the atypical kinase-like protein COQ8 that enhance its ATPase activity. They develop an analog-sensitive version of COQ8 that can be covalently inhibited, enabling acute inhibition of COQ8 ATPase activity in vitro and coenzyme Q biosynthesis in vivo.

Conserved Lipid and Small-Molecule Modulation - cell.com

Lacing. Lacing is a mechanism to save space when storing data. It is typically used for small blocks of data (referred to as frames in matroska). There are 3 types of lacing : the Xiph one inspired by what is found in the Ogg container, the EBML one which is the same with sizes coded differently and the fixed-size one where the size is not coded.
