

### **geometrical theory of diffraction pdf**

Diffraction refers to various phenomena that occur when a wave encounters an obstacle or a slit. It is defined as the bending of waves around the corners of an obstacle or aperture into the region of geometrical shadow of the obstacle. In classical physics, the diffraction phenomenon is described as the interference of waves according to the Huygens-Fresnel principle that treats each point ...

### **Diffraction - Wikipedia**

Laser diffraction analysis, also known as laser diffraction spectroscopy, is a technology that utilizes diffraction patterns of a laser beam passed through any object ranging from nanometers to millimeters in size to quickly measure geometrical dimensions of a particle. This process does not depend on volumetric flow rate, the amount of particles that passes through a surface over time.

Astronomical Refracting Telescope . The angle subtended by the object  $\hat{I}_\pm$  (alpha), is given by: . The angle subtended by the image  $\hat{I}^2$  (beta), is given by: . Angular magnification  $M$  is by definition the ratio of  $\hat{I}^2$  to  $\hat{I}_\pm$ : . Substituting for  $\hat{I}_\pm$  (alpha) and  $\hat{I}^2$  (beta) from above, . So for maximum magnification, a telescope requires a long objective focal length and a short eyepiece focal length.
