Dog food is food specifically formulated and intended for consumption by dogs and other related canines. Like all carnivores, dogs have sharp, pointed teeth, and have short gastrointestinal tracts better suited for the consumption of meat than of vegetable substances. In spite of this natural carnivorous design, dogs have still managed to adapt over thousands of years to survive on the meat and ...

Cat food is food for consumption by cats. Cats have specific requirements for their dietary nutrients. Certain nutrients, including many vitamins and amino acids, are degraded by the temperatures, pressures and chemical treatments used during manufacture, and hence must be added after manufacture to avoid nutritional deficiency. The amino acid taurine, for example, which is found in meat, is ...
