The MSc Programme in Integrated Product Design approaches the Product Design discipline in a comprehensive and systemic way, with a strong cultural attitude. Within an accelerated social and technical progress, products progressively evolve into complex systems that merge both tangible and intangible aspects.

Design of an electronic product that considers both hardware and software aspects, although this is often called co-design (not to be confused with participatory design, which is also often called co-design). The requirement for integrated design comes when the different specialisms are dependent on each other or "coupled".
