Object-oriented programming (OOP) is a programming paradigm based on the concept of "objects", which may contain data, in the form of fields, often known as attributes; and code, in the form of procedures, often known as methods. A feature of objects is that an object's procedures can access and often modify the data fields of the object with which they are associated (objects have a notion of ...

Human resource management (HRM), the management of work and people towards desired ends, is a fundamental activity in any organization in which human beings are employed. It is not something whose existence needs to be elaborately justified: HRM is an inevitable consequence of starting and growing an organization. This article focuses on the scope of HRM and its major subfields.
