Saving and Loading. Qt comes with QFileDialog, which is a dialog from which the user can select a file. The image above shows the dialog on Kubuntu. The static `getOpenFileName ()` function displays a modal file dialog. It returns the file path of the file selected, or an empty string if the user canceled the dialog.

Include Files and Forward Declarations. Use the Qt 4/Qt 5 syntax for #include files, and order them alphabetically: #include <QApplication> #include <QComboBox> #include <QStringList>. In your .h files, try to include as few headers as possible, using forward declarations when feasible in alphabetical order.
