Special Education Data Collection, Analysis and Reporting (SEDCAR) Unit of Vocational and Educational Services for Individuals with Disabilities is responsible for data collection, analysis, and reporting to meet federal and State requirements for special education and vocational rehabilitation. SEDCAR analyzes data to evaluate the State's progress toward accomplishing the Department's ...

Special Education Data Collection, Analysis and Reporting

Data analysis is a process of inspecting, cleansing, transforming, and modeling data with the goal of discovering useful information, informing conclusions, and supporting decision-making. Data analysis has multiple facets and approaches, encompassing diverse techniques under a variety of names, while being used in different business, science, and social science domains.

Data analysis - Wikipedia

Missing completely at random. Values in a data set are missing completely at random (MCAR) if the events that lead to any particular data-item being missing are independent both of observable variables and of unobservable parameters of interest, and occur entirely at random. When data are MCAR, the analysis performed on the data is unbiased; however, data are rarely MCAR.
