

solved problems in physics pdf

Chapter 6 deals with the special theory of Relativity. Problems are solved under Lorentz transformation of length, time, velocity, momentum and energy, the invariance of four-momentum vector, transformation of angles and Doppler effect and threshold of particle production. Chapters 7 and 8 are concerned with problems in low energy Nuclear physics.

of the problems, and even less wise to favour particular paths to resolutions. The aim is to state the problems compactly and give, objectively, comments on possible routes whereby they might be solved. The material is organized, as far as its interdependence allows, in the order of particle physics to astro-physics.
