

### **the septic system owners pdf**

Main t e n a n c e Chemicals improperly disposed of through a septic system also can pollute local water sources and can contribute to early system failures.

### **Small Community Wastewater Issues Explained to the Public**

The two most common myths on the subject of septic system function are that the septic tank treats the sewage, and that the soil filters the remaining particles creating pure water underground.. In fact the septic tank is merely a concrete box that holds roughly two days of sewage. In the calm environment of the tank, dirt and solids settle out and fall to the bottom.

### **Septic System Design - Eco-nomic**

A septic tank is an underground chamber made of concrete, fiberglass or plastic through which domestic wastewater flows for basic treatment. Settling and anaerobic processes reduce solids and organics, but the treatment efficiency is only moderate (referred to as "primary treatment"). Septic tank systems are a type of simple onsite sewage facility (OSSF).
